# 01 Overview

ArcX is the world's first metaverse ecosystem project to integrate physical arcade machines into Web3. The initial product lineup will focus on coin pushers, claw machines, and capsule toy machines. These physical machines can use cryptocurrency as game tokens, allowing users to enjoy the game and also earn profits.

All physical arcade machines are developed and manufactured by the team, and we have also obtained multiple technology patents. We will continue to focus on providing more high-quality physical arcade machines to offer users a better gaming experience. Unlike traditional arcade games, we will integrate features of RWA, Gamefi, Defi, AIGC, and other blockchain technologies to create a multi-dimensional encrypted arcade metaverse full of innovation and fun.

ArcX will also establish a public chain to provide data on-chain, anti-counterfeiting and traceability, patent technology registration, and other services for all physical machines. By combining blockchain with real assets, we will provide comprehensive blockchain services for physical arcade machines worldwide.

# 01 Overview

An open Web3 community is formed by a professional R&D team and users distributed around the world.

Physical arcade machine, real assets.  
Innovative virtual and real blockchain game.

Global Trend IP Collaboration  
Cross-border cooperation,  
breaking industry barriers  
Based on Web3, embracing Web2.

Unique economic model

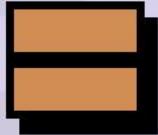

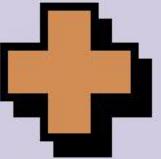

NFT empowered by  
multiple parties

Brand new  
public chain  
Endless  
possibilities

## 02 Gameplay

## 02 Gameplay

### Gacha Machine

Every spin is worth looking forward to.  
Every drop is full of surprises.

### Coin pusher

Popular arcade machines create the web3 trend, play live broadcast.

### Claw machine

Gameplay suitable for all ages.  
IP cross-industry linkage.

## 02 Gameplay

Draw cards to obtain game NFT props and trade them freely on the chain.

### NFT Free Trading

Play online and control the machine remotely.  
Combining reality and reality, a new metaverse interactive experience!

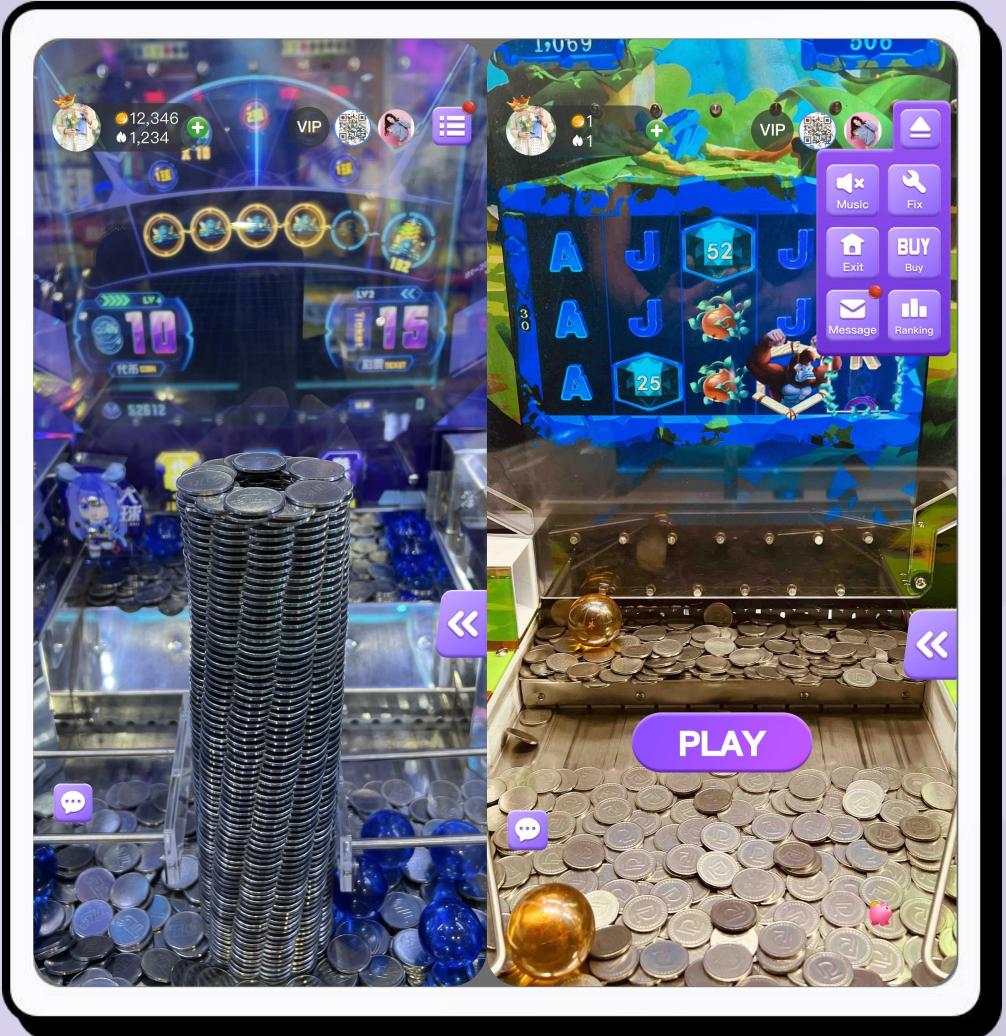

### 7X24 Global Live

### Game Partner

Holding designated NFT can become a game partner and obtain the privilege of cooperative sales of game currency.

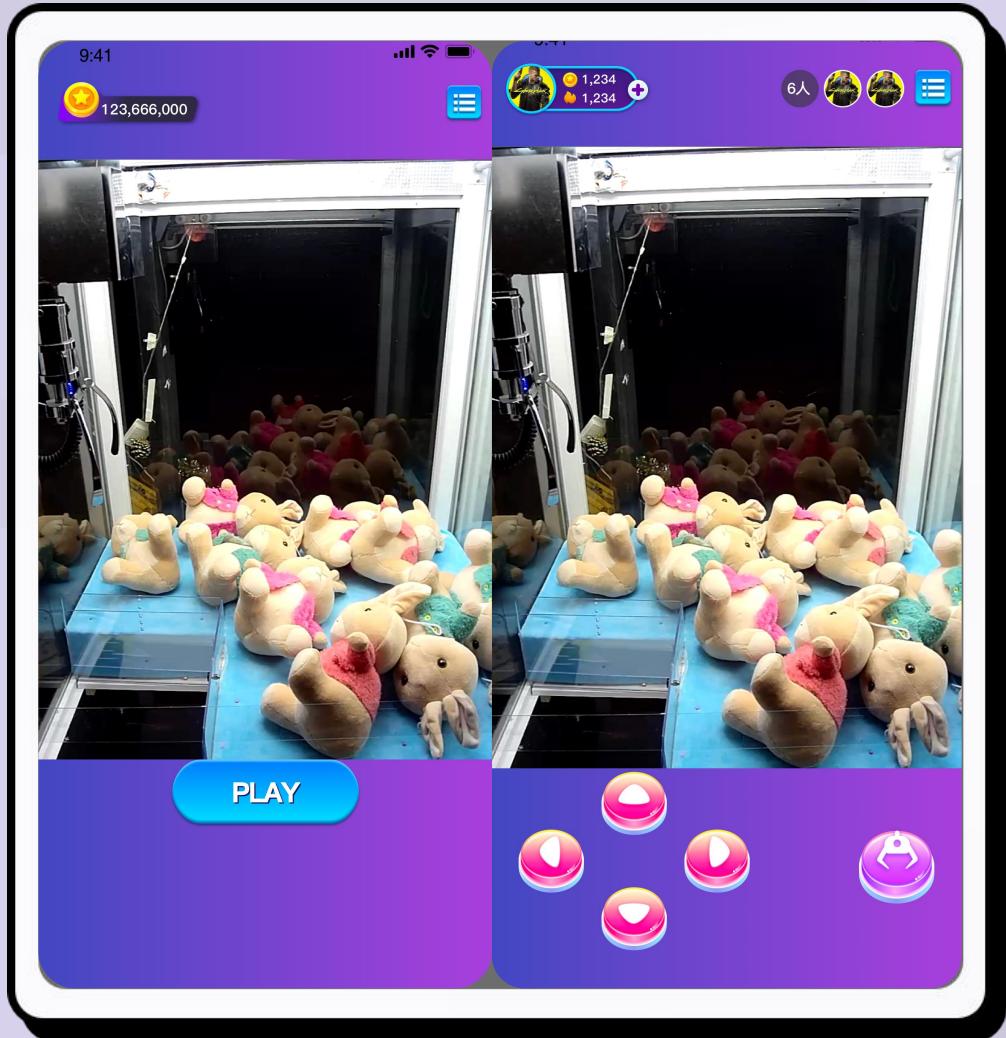

## 02 Gameplay

Players remotely control real coin pushers online.  
After dropping coins and dragon balls,  
players can receive rewards such as  
**TOKEN**.  
The fun of pushing coins is irreplaceable!

**Coin pusher**

## 02 Gameplay

Players remotely control the real claw machine online, and after moving the clips to capture items, players can receive rewards such as TOKEN.

IP, games, NFT, various linkages, Web3's claw machine can be used for everything!

Claw machine

## 02 Gameplay

Players can remotely control real gashapon machines online, rotate buttons, and obtain TOKEN and other rewards.

Gacha is essential in Web3!

**Gacha Machine**

## 02 Gameplay

Collect all the series by drawing cards to get various precious game bonus props and TOKEN and other rewards.

Multiple seasons, no upper limit, and the collection gameplay makes people enjoy it endlessly.

Collect cards to win gifts

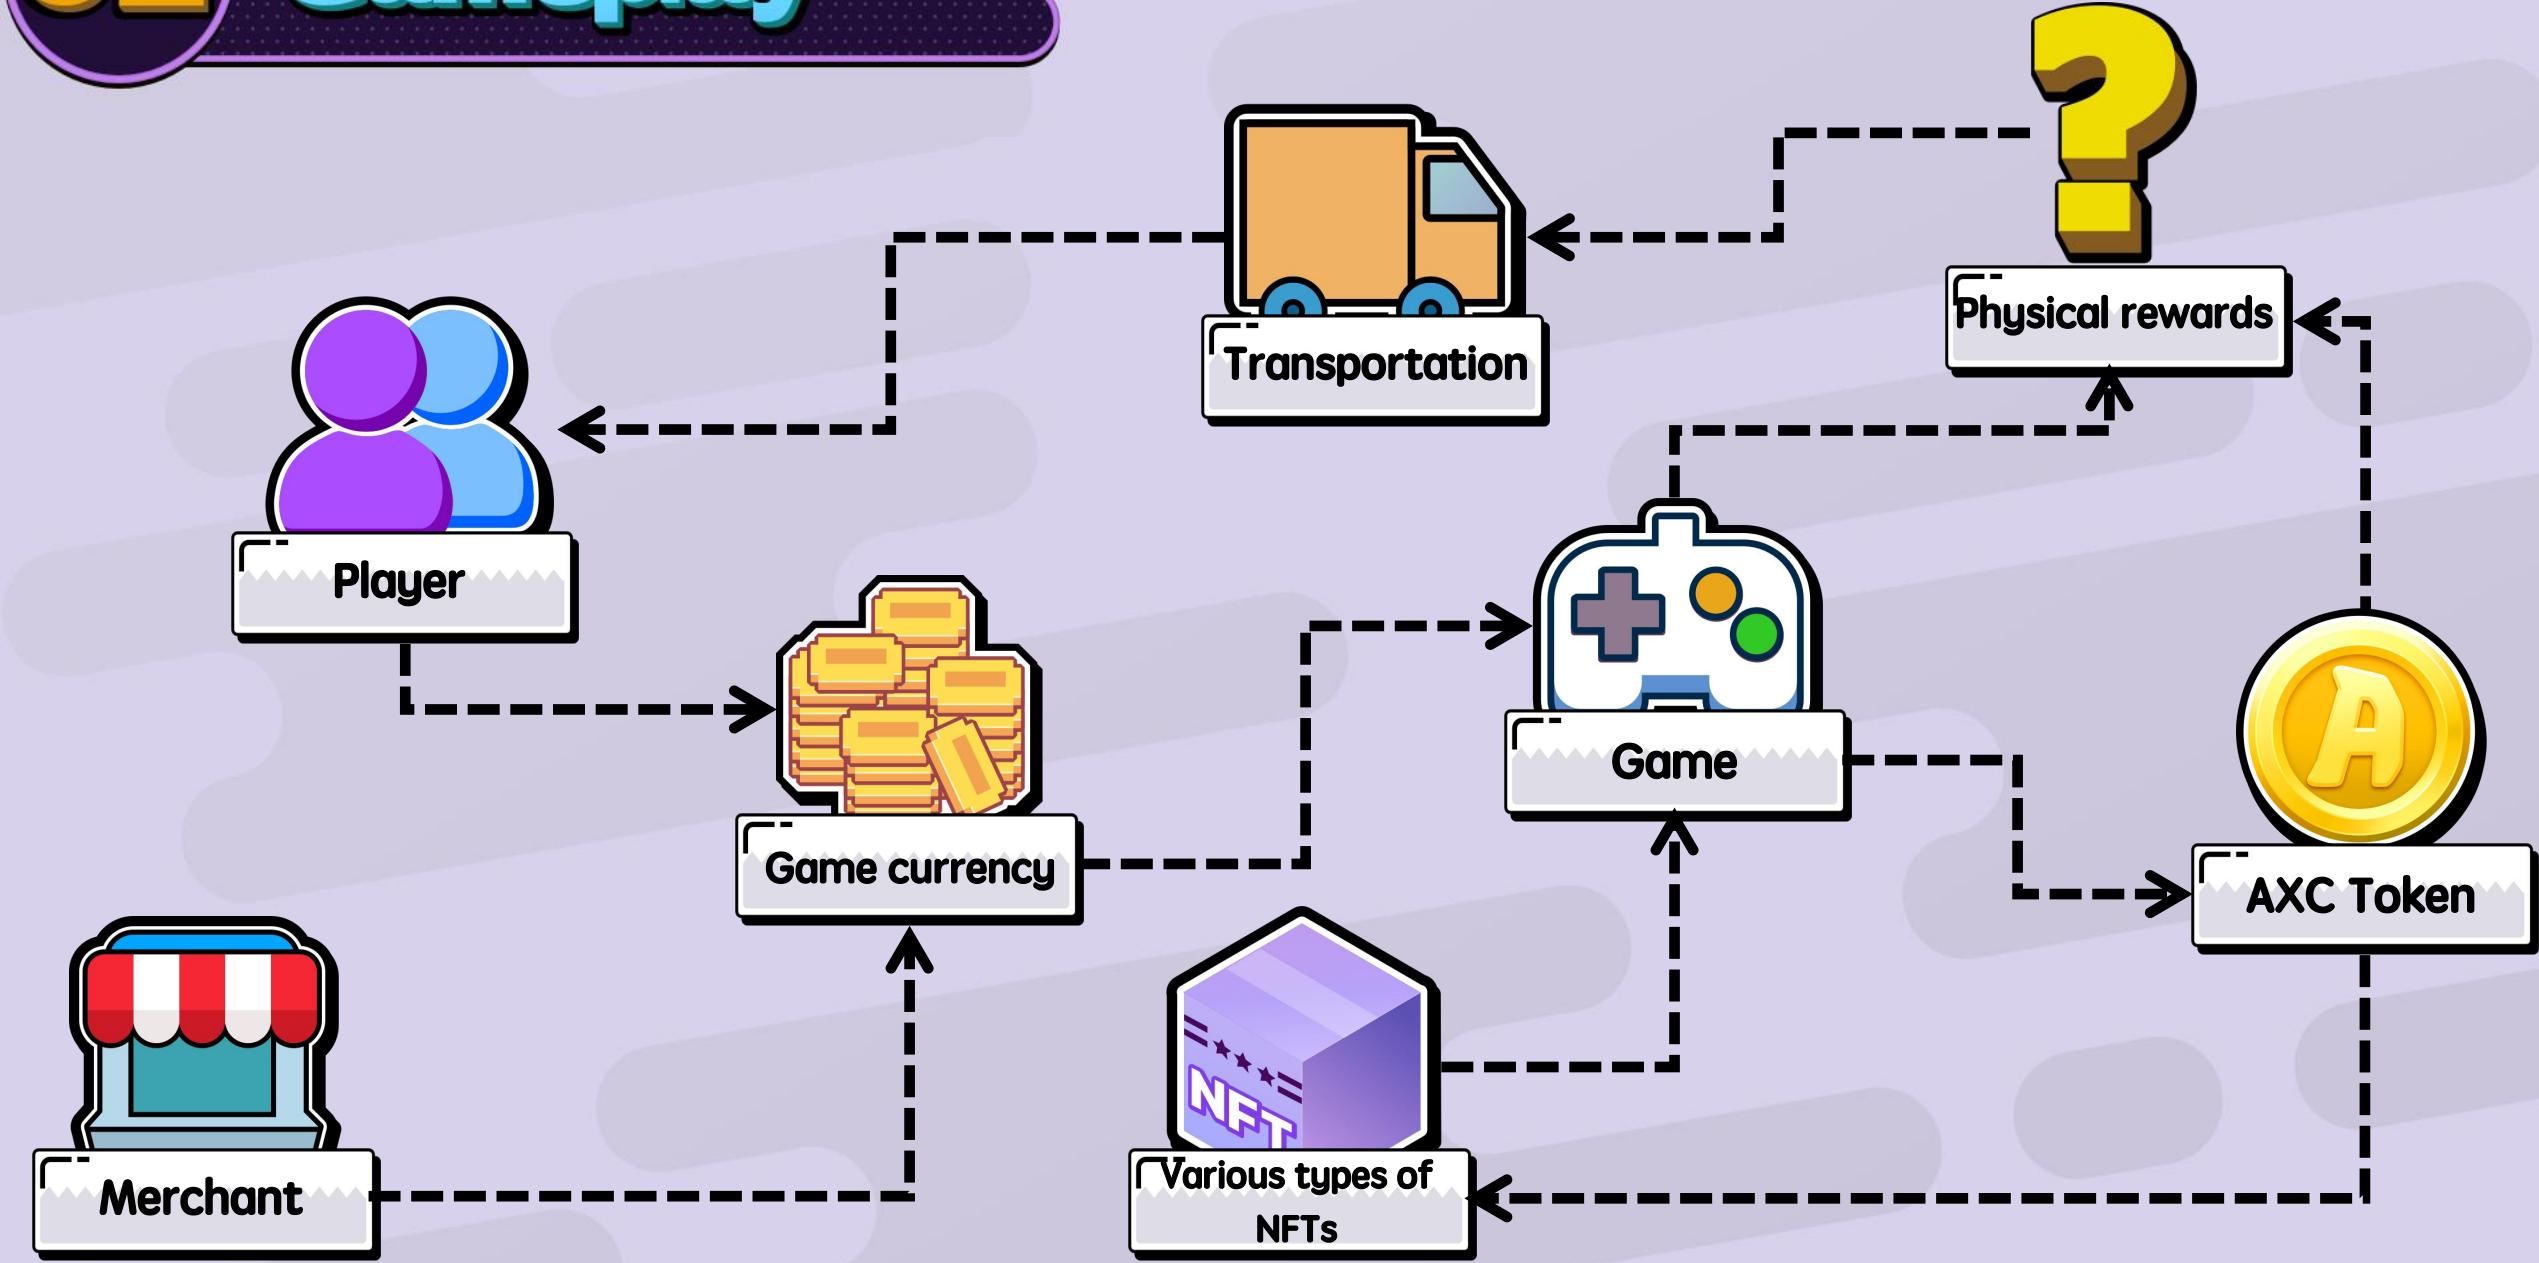

## 02 Gameplay

A variety of game reserves cover various types and styles, allowing players to enjoy games of different themes in ArcX.

Continuous new game development to keep content updated and diverse.

# 03 NFT

**Category:** Coin pusher NFT fragments

**Protocol:** ERC-721

**Total cap:** 2000

**Sales target:** Web3 players/investors

**[Features]** A machine consists of 20 designated NFTs, and each NFT represents 5% ownership of the real machine. Holding a complete NFT is equivalent to owning a real machine in the real world. Each NFT held by the holder will continue to receive profits from the corresponding numbered machine.

**[Advertisement]** Holders can also increase machine exposure by publishing advertisements, thereby increasing machine income opportunities.

**[Lease]** Holders can also rent out NFT and earn deterministic and stable income.

# 03 NFT

Type: Coin exchanger NFT

Protocol: ERC-721

Total limit: 200

Sales target: KOL/community leader/influential player/investor

**[Features]** By holding NFT, you can become a sales representative of game coins.

It is allowed to obtain game coins at a 50% to 30% discount price and sell them to other players at a high price to earn profit from the price difference.

**[Advertisement]** Holders can also increase machine exposure by publishing advertisements, thereby increasing machine income opportunities.

# 04 TOKEN

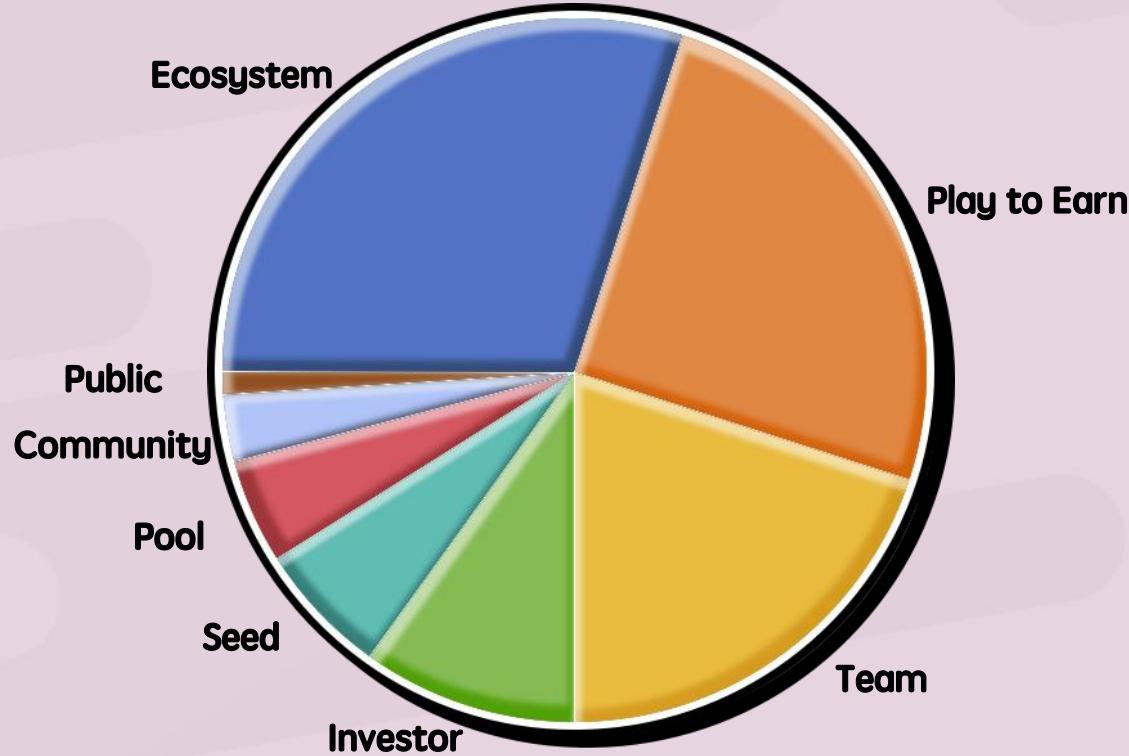

ARCX serves as the governance token and utility token for gaming in the ecosystem, granting players the right to participate in project governance and voting, allowing them to collectively decide the direction of the game's development. In addition to governance functions, ARCX plans to achieve token deflation through gameplay, further increasing the scarcity and value of the token. What's even more exciting is that ARCX will deploy a brand-new public chain in the future and serve as the Gas token. This will provide more efficient and cost-effective transactions and smart contract execution for the entire ecosystem.

AXC is the gaming token of the ARCX project, with no total supply limit. All tokens are generated entirely through gameplay and are mainly used and consumed within the game, serving as a vital currency in the game's economic system.

AXC has a unique mechanism of dynamic generation and destruction to avoid various extreme situations.

# 04 TOKEN

**ArcX ecological governance token**

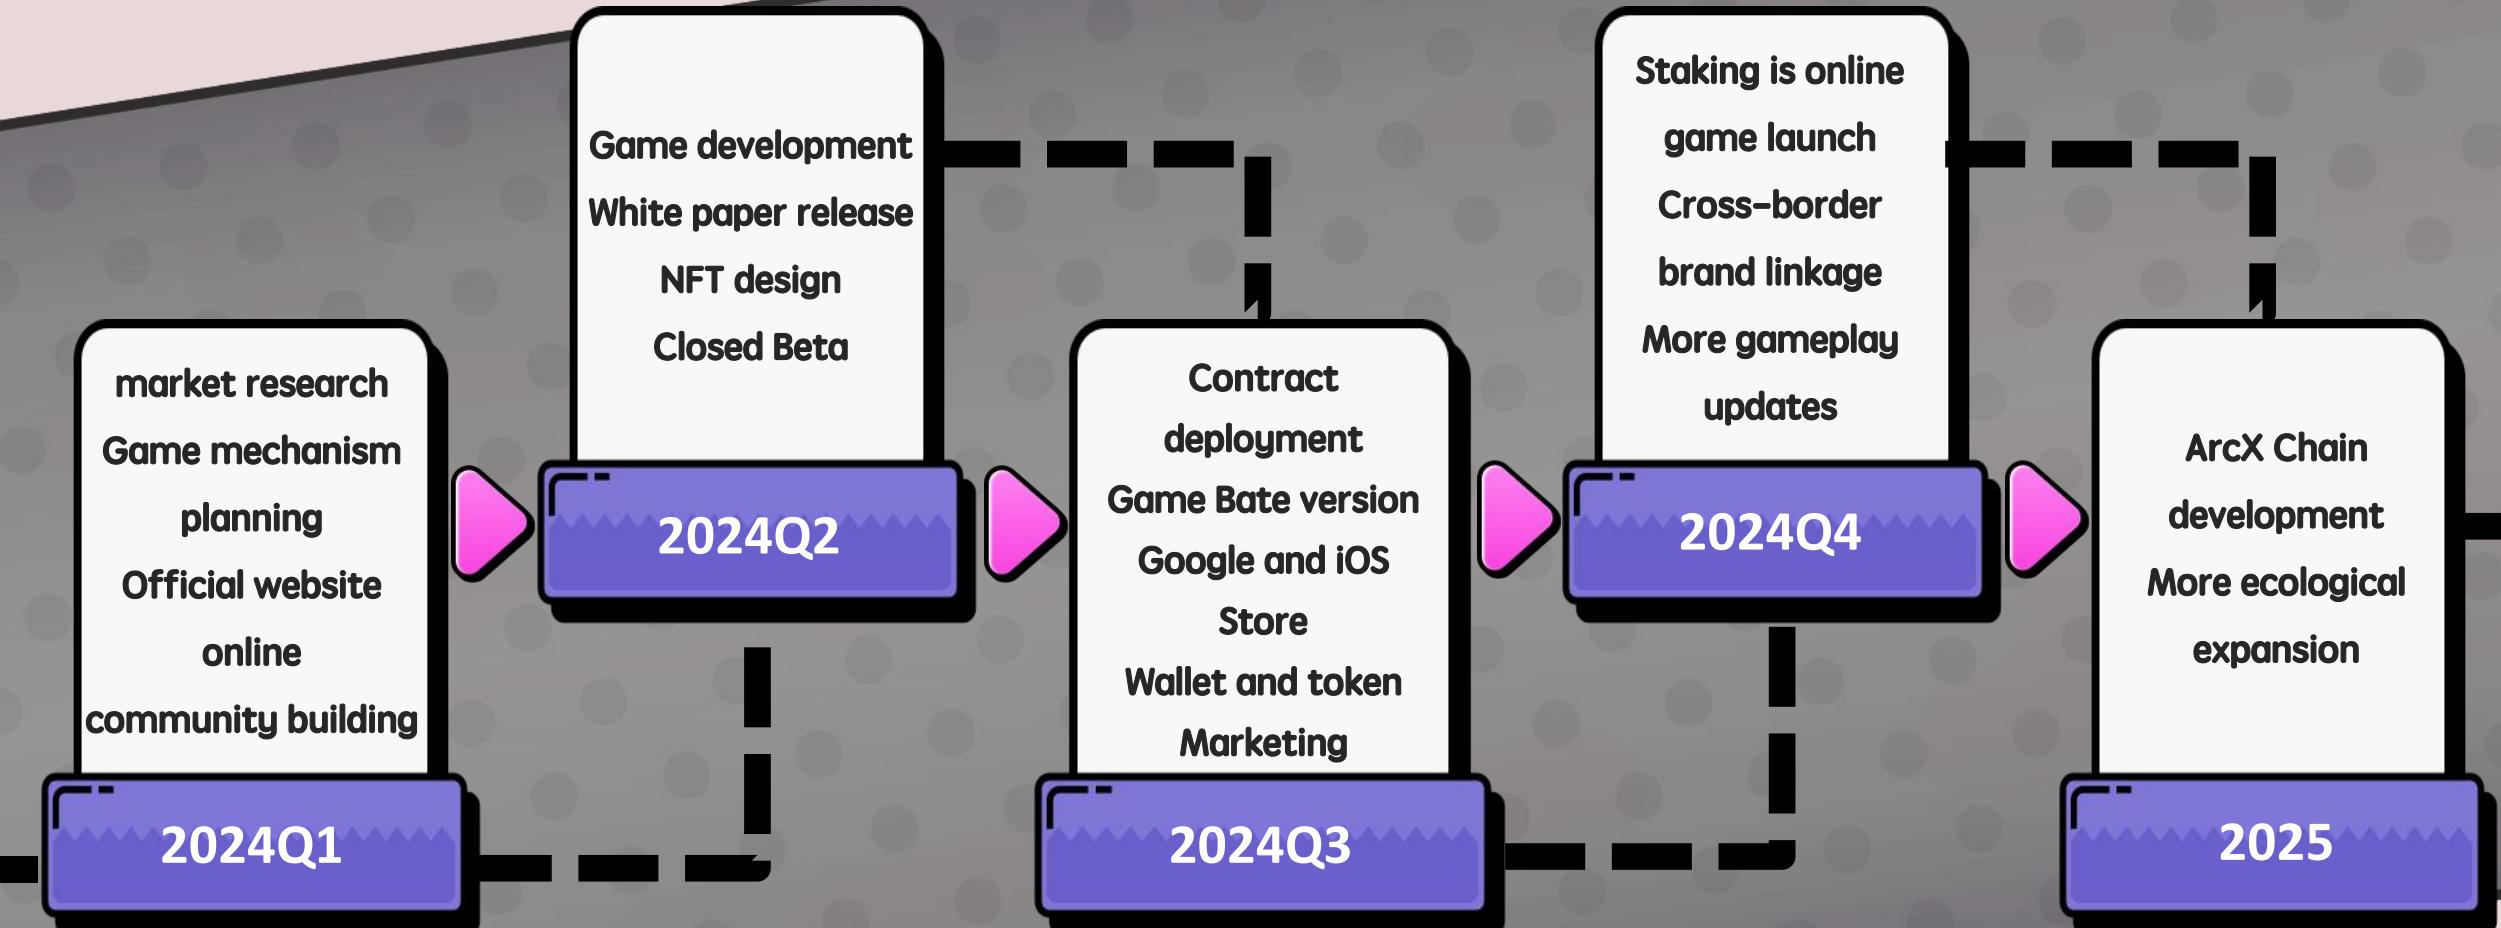

- **P2E:** ? %, all generated through the game
- **Team:** ? %, locked for 5 years, released every quarter
- **Public:** ? %, released immediately after IDO ends
- **Seed:** ? %, 50% is released immediately, and the remaining 20% is released monthly
- **Investor:** ? %, locked for 5 years, released quarterly
- **Community:** ? %, multiple irregular airdrops and rewards
- **Ecosystem:** ? %, ecological sustainable development reserve
- **Pool:** ? %, DEX liquidity pool supply

# Roadmap

05

# 05 Roadmap

# TEAM

The CTO graduated from Harding University in the United States and has more than 10 years of game development experience, focusing on casual and arcade game types.

Full stack developer, good at network and system deployment, database design, engine optimization, etc.

ArcX's founder and CEO has 12 years of experience in the arcade and Web2 gaming industries. He has authored a patent for remote control of arcade machines and is a distinguished leader in the arcade gaming industry and a blockchain entrepreneur.
